EDUCATION

The Chinese University of Hong Kong, Shenzhen

Shenzhen, China

Incoming Ph.D. Student in Economics

Fall 2027

Central University of Finance and Economics

Beijing, China

B.A. in Economics (Insurance), School of Insurance

Sep 2023 – Jun 2027 (expected)

- GPA: 92/100; Rank: 2/45.

RESEARCH INTERESTS

Empirical Industrial Organization; Applied Microeconomics; Applied Econometrics

WORK IN PROGRESS

“Demand for Rare Success: Salient Realizations and Latent Quality in the Stallion Market”
with Sen Lu

- Study demand in a differentiated-product market in which product value depends on latent probabilities of rare success, using the Japanese thoroughbred stallion market as the empirical setting.
- Construct the underlying research dataset in Python by scraping, cleaning, linking, and processing more than 400,000 records from Netkeiba and JBIS into a stallion-year panel.
- Develop and estimate a pedigree-nested logit demand model, separating persistent latent quality from salient recent realizations.
- Find that recent graded-stakes progeny victories substantially increase demand despite providing limited additional information about future elite performance.

RESEARCH EXPERIENCE

Research Assistant to Sen Lu

2026 – Present

- Construct county-level market panels by combining CMS home health agency records with demographic and economic data from multiple administrative sources.
- Implement and compare alternative entry models under different informational assumptions, including Bresnahan–Reiss, Berry-style, and Seim-style entry models.

HONORS AND AWARDS

- University Fellowships, Central University of Finance and Economics 2023–2025

SKILLS

Programming: Python, Stata, $\text{\LaTeX}$

Research Methods: Discrete-choice demand estimation, entry models, difference-in-differences

Languages: Mandarin Chinese (native); English (IELTS 7.0)
